

Amelie full

109 bars · 2509 notes · key of Em (minor), 4/4 time, 90 bpm

The left hand is the engine. It barely changes across the whole piece (7% new material), so drill it until you can play it without thinking. All the difficulty is in the right hand (47% new) — put your attention there when you put the hands together.

Chords in this piece

This song has 4 chords. Once you learn it, you'll have 4.

Left hand

Form: **A A A A A A A A A A A A A A A**. This hand barely changes across the piece — learn it once.

The cycle consists of 4 measures, with 99% of the strokes from measure 1 to measure 109 matching. Mastering this cycle means mastering almost all of this part of the hand.

L1 · Em · 27 measures (25%)

4 keys. This is the pose you need to learn first.

Measures: 1, 5, 9, 13, 17, 21, 25, 29, 33, 37, 41, 45, 49, 53...

L2 · G · 27 measures (25%)

Swap the positions of the two keys as they are now.

Measures: 2, 6, 10, 14, 18, 22, 26, 30, 34, 38, 42, 46, 50, 54...

L3 · Bm · 27 measures (25%)

Just change one key from its previous position.

Measures: 3, 7, 11, 15, 19, 23, 27, 31, 35, 39, 43, 47, 51, 55...

L4 · D · 27 measures (25%)

Just change one key from its previous position.

Measures: 4, 8, 12, 16, 20, 24, 28, 32, 36, 40, 44, 48, 52, 56...

The little finger remains in place on D at 3/4 of the position — the hand barely has to move.

One square per bar, coloured by which figure it uses. A repeating cycle shows up as stripes.

Small exercise

The hard part is not any single position, it is the move between them:

- **L1 → L2** (bars 1–2, 2 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.
- **L2 → L3** (bars 2–3, 1 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.
- **L3 → L4** (bars 3–4, 1 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.
- **L4 → L1** (bars 4–5, 4 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.
- **L4 → L5** (bars 108–109, 2 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.

Blocking chords: instead of strumming each note, press E3+G3+B3+E4 simultaneously. Your hand will remember the key distances much faster than strumming. Try closing your eyes—your hand should be able to measure the distances without looking.

Rhythm variations — same notes, same fingering, only the timing changes:

- **Long – short:** Odd notes held, even notes snapped short.
- **Short – long:** The reverse. Any weak finger shows up here.
- **In pairs:** Play each pair together, stop, then the next pair.

Overlap — never stop on the last note of a chunk:

- Play bar 1 through and carry straight on into the first note of bar 2.
- Play bar 2 through and carry straight on into the first note of bar 3.
- Play bar 3 through and carry straight on into the first note of bar 4.
- Play bar 4 through and carry straight on into the first note of bar 109.

Tempo ladder: 45 → 56 → 68 → 79 → 90 bpm. Only move up a rung after three clean run-throughs at the current one.

Right hand

Form: **A B C A B C D D E F A B C G**. Only 49 of 105 bars are new material; the rest are sections coming back.

A · ô 5–12

B · ô 13–20

C · ô 21–28

A · ô 29–36

B · ô 37–44

C · ô 45–52

D · ô 53–60

Remaining passages — 8 bars

2 bars repeat but did not fit as their own card, 6 bars appear only once. In film themes and ballads the unrepeated stretch is usually the climax — the part most worth learning, and it has to come straight from the score.

One square per bar, coloured by which figure it uses. A repeating cycle shows up as stripes.

The hard part is not any single position, it is the move between them:

- **R4 → R6** (bars 5–6, 1 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.
- **R6 → R4** (bars 6–7, 3 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.
- **R4 → R7** (bars 7–8, 0 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.

- **R7 → R4** (bars 8–9, 3 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.
- **R7 → R5** (bars 12–13, 2 keys change): drill just the four notes around the change, back and forth, until the hand finds the position on its own.

Chặn hợp âm: thay vì rải từng nốt, bấm cùng lúc B4+E5+B5 rồi B4+C5+E5+B5. Tay nhớ cự ly phím nhanh hơn nhiều so với rải. Thử nhắm mắt — tay phải tự đo được khoảng cách mà không cần nhìn.

Hotspots — drill these first

Ranked by difficulty times how often the passage comes back. Clear these and the rest follows.

- Bars 23–24 — a wide stretch, the hand shifts position repeatedly (recurs 6 times).
- Bars 21–22 — a wide stretch, the hand shifts position repeatedly (recurs 6 times).
- Bars 95–96 — a wide stretch, the hand shifts position repeatedly (recurs 4 times).
- Bars 17–18 — a wide stretch, a lot of notes in a short time (recurs 4 times).
- Bars 7–8 — a wide stretch, a lot of notes in a short time (recurs 3 times).
- Bars 61–62 — a wide stretch, the hand shifts position repeatedly (recurs 2 times).

How to practise

1. Start with the **first left-hand card** — that is where the piece opens. Press the highlighted keys in the order 1, 2, 3...
2. Play only the **chord tones** at first. Add the colour notes once the shape is comfortable.
3. Play slowly, around half the marked tempo. Speed up after three clean run-throughs.
4. Once a card is solid, apply it to **every bar listed at the bottom of it** — those are the identical ones.
5. Finish the left hand before starting the right. Put the hands together last, a short passage at a time.

If a card shows notes that do not match the score in front of you, trust the score — report it rather than practising the card.
